Projects:-

Make My Home(.NetCore,MSSQL,Entity Framework,C#,JQuery,Bootstrap,HTML,CSS,HTML Helper):-

In this project customer directly order the material from the vender and we will get 1% profit from vender order

Feature:-

- I have create 5 module in this project(General Zone,Customer Module,Vender Zone,Area Manager,Admin Zone)
- General Zone manage the search the vender by place name ,vender name ,pin code,rating.
- Customer Module manage the own profile ,order the material ,search material,feedback ,Enquiry & Rating to the vender,login ,sign up manage also.
- Vender zone manage by own profile ,list of product and order of product,cost of product,Login,customer block.
- Area Manager manage by own profile,verify the vender details,Add venders ,provide the userId And Password ,block vender,customer,manage vender and customer zone.
- Admin zone manage the area details,block area manager,see profits those shared by vender Using this Website

Hospital Management (MERN , JavaScript, HTML ,CSS ,Bootstrap ,MongoDB And Mongoose.)::-

Features :-

- I have done in this project **Add ,delete ,update & show** of doctor and patient details with the help of **mongoose**.
- I have Manage **doctor fees charge** and **patient balance fees** .
- I have Manage **Searching doctor details** with their Name ,Qualification And Disease specialist.
- I have Manage **Search patient** with patient Adhar number.
- I have done **Patient Login** (patient only see own details with Adhar number).
- **Admin Login** (Manage every thing) ,I Have Add Change Admin Password.

Note: Apart from to project I also developed 8 other [project](#) .

Hobbies:-

My hobbies are playing volleyball and listening song.
